# For the mC-Print Series Thermal Printers

Does your iPad keep dropping signal? SteadyLAN is the answer!

WiFi-like internet service to your mobile device!

Star's unique SteadyLAN technology makes unstable Wi-Fi signals a thing of the past!

Give your device internet + charge with SteadyLAN.

- Direct data transfer between iOS, Android, and Windows devices and the printer via Apple Lightning or USB-C cable

- Direct Ethernet connectivity to devices from the wired Ethernet port of the printer

- Device charging via Apple Lightning cable or USB-C cable

- Peripheral control (scanner, display) via printer USB host ports

SteadyLAN ® is a patent-pending technology available on select models of the mC-Print Series printers. It provides wired Ethernet service to iOS, Android, and Windows devices connected to a networked printer via the Lightning or USB-C® cable.

SteadyLAN is available on the following mC-Print models: mCP21LB, mCP31L, mCP31LB, mCP31C.
